# Why choose Terracotta tiles?

## **Ceramic colour that lasts a lifetime**

Terracotta tiles outperform all other roofing materials, with superior colour performance that will not fade over time. During the manufacturing process, Terracotta tiles are baked at temperatures over 1100° ensuring durability and longevity of colour. Backed by 50 year colour & performance guarantee, Terracotta tiles will ensure your home looks timeless for years to come.

## **Noise reduction**

Roof tiles allow homeowners to enjoy a quieter home without compromising on design or upgrading for soundproofing material. The density of the roof tile provides up to 25 decibels, superior to other roofing materials available, allowing you to achieve more comfort in your home by reducing unwanted external noise.

## **Flexible design options**

Terracotta tiles are not only about Heritage & Traditional styled homes. With continuous change in trends, our Luxe Collection includes various colours from traditional earthy tones to modern grey tones. There are also a range of options of bumpy to flat profiles, providing true design flexibility.

## **Tiles are sustainable**

Roof tiles have impressive thermal performance, last longer and can be recycled or reused after they have lived out their life on your home. Having an energy efficient home comes down to the material that it is built with, and living sustainably not only benefits your home but the environment.

Terracotta

# Urban Shingle

Urban Shingle is the epitome of contemporary styling, delivering a flat & seamless roof tile. With a unique rolled nose, this tile provides quality, style and superior performance.
